Refinances JPMorgan Chase Bank ("JPM") Credit Facility and Reduces Cost of Capital***

Declares Quarterly Distribution of \$0.63 Per Share

NEW YORK, May 10, 2022 (GLOBE NEWSWIRE) -- Portman Ridge Finance Corporation (Nasdaq: PTMN) (the "Company" or "Portman Ridge") announced today its financial results for the first quarter ended March 31, 2022.

First Quarter 2022 Highlights

- Net asset value ("NAV") for the first quarter of 2022 remained relatively flat at \$278.3 million (\$28.76 per share¹) as compared to \$280.1 million (\$28.88 per share) in the fourth quarter of 2021, despite pervasive market volatility and other macro-economic and political factors.
- Total investment income the first quarter of 2022 was \$16.9 million, of which \$13.0 million was attributable to interest income from the debt securities portfolio.
- Excluding the impact of purchase price accounting, core investment income² for the first quarter of 2022 was \$15.1 million.
- Net investment income ("NII") for the first quarter of 2022 was \$7.9 million (\$0.82 per share).
- Total investments at fair value as of March 31, 2022 was \$568.0 million; when excluding CLO Funds, Joint Ventures and short-term investments, these investments are spread across 30 different industries and 116 entities with an average par balance per entity of approximately \$3.3 million.
- As of March 31, 2022, six of the Company's debt investments were on non-accrual status compared to seven as of December 31, 2021.
- As of March 31, 2022, par value of outstanding borrowings was \$352.4 million with an asset coverage ratio of total assets to total borrowings of 180%. On a net basis, leverage as of March 31, 2022 was 0.97x.³
- During the quarter, the Company restructured its stock buybacks and repurchased 22,990 of shares under its Renewed Stock Repurchase program at an aggregate cost of approximately \$545 thousand.

¹ NAV per share as determined in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, was decreased 5 cents per share due to the impact of a one-time quarterly tax provision.

² Core investment income represents reported total investment income as determined in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, less the impact of purchase price discount accounting in connection with the Garrison Capital Inc. ("GARS") and Harvest Capital Credit Corporation ("HCAP") mergers. Portman Ridge believes presenting core investment income and the related per share amount is useful and appropriate supplemental disclosure for analyzing its financial performance due to the unique circumstance giving rise to the purchase accounting adjustment. However, core investment income is a non-U.S. GAAP measure and should not be considered as a replacement for total investment income and other earnings measures presented in accordance with U.S. GAAP. Instead, core investment income should be reviewed only in connection with such U.S. GAAP measures in analyzing Portman Ridge's financial performance.

³ Net leverage is calculated as the ratio between (A) debt, excluding unamortized debt issuance costs, less available cash and cash equivalents, and restricted cash and (B) NAV. Portman Ridge believes presenting a net leverage ratio is useful and appropriate supplemental disclosure because it reflects the Company's financial condition net of \$83.6 million of cash and cash equivalents. However, the net leverage ratio is a non-U.S. GAAP measure and should not be considered as a replacement for the regulatory asset coverage ratio and other similar information presented in accordance with U.S. GAAP. Instead, the net leverage ratio should be reviewed only in connection with such U.S. GAAP measures in analyzing Portman Ridge's financial condition.

Subsequent Events

- Declared a stockholder distribution of \$0.63 per share for the second quarter of 2022, payable on June 7, 2022 to stockholders of record at the close of business on May 24, 2022.
- On April 29, 2022, the Company refinanced its Revolving Credit Facility with JPMorgan Chase Bank as administrative agent. The amended agreement places three-month SOFR as the benchmark interest rate and reduces the applicable margin to 2.80% per annum from 2.85% per annum. Other amendments include the extension of the reinvestment period and scheduled termination date to April 29, 2025 and April 29, 2026, respectively.

Management Commentary

Ted Goldthorpe, Chief Executive Officer of Portman Ridge, stated, "Despite operating in an environment with rising interest rates, market volatility, and the war in the Ukraine, we reported a relatively unchanged NAV per share for the first quarter, reduced our non-accruals, and maintained our dividend

of \$0.63 per share. While many of our peers have seen raised interest rates on their lines of credit and outstanding debt, we have been able to restructure our agreement with JPMorgan Chase and lower the interest rate, shift from LIBOR to SOFR, and extend the maturity date by 2 ½ years. Although investment activity and originations were lower in the first quarter of 2022 as compared to the second half of 2021, a sector-wide trend, subsequent to quarter end we have deployed approximately \$35 million of our available cash in new investments and have a pipeline of an additional \$20 million to \$30 million we expect to deploy before the end of the second quarter. We are also pleased to announce that we have added two new seasoned members to our board. Overall, we believe that we are well-positioned to further improve our portfolio performance and increase investment income in 2022.”

As of March 31, 2022, six of the Company's debt investments were on non-accrual status compared to seven investments on a non-accrual status as of December 31, 2021. Investments on non-accrual status as of March 31, 2022 decreased to 0.2% and 1.9% of the Company's investment portfolio at fair value and amortized cost, respectively, compared to 0.5% and 2.8% as of December 31, 2021.

Liquidity and Capital Resources

As of March 31, 2022, we had \$352.4 million (par value) of borrowings outstanding with a weighted average interest rate of 3.2%, of which \$108.0 million par value had a fixed rate and \$244.4 million par value had a floating rate. Portman Ridge expects future portfolio investments to predominately be floating rate investments.

As of March 31, 2022, the Company had unrestricted cash of \$20.5 million and restricted cash of \$63.1 million. This compares to unrestricted cash of \$28.9 million and restricted cash of \$39.4 million as of December 31, 2021. As of March 31, 2022, we had \$34.4 million of available borrowing capacity under the Senior Secured Revolving Credit Facility, and \$25.0 million of borrowing capacity under the 2018-2 Revolving Credit Facility.

Total assets and shareholder's equity as of March 31, 2022 were \$660.9 million and \$278.3 million respectively, as compared to \$648.3 million and \$280.1 million, respectively as of December 31, 2021.

As of March 31, 2022 and December 31, 2021, the fair value of investments and cash were as follows:

(\$ in thousands)

Security Type	March 31, 2022	December 31, 2021
Cash and cash equivalents	\$ 20,524	\$ 28,919
Restricted Cash	63,094	39,421

Total	\$ 651,629	\$ 615,913

Interest Rate Volatility

The Company's investment income is affected by fluctuations in various interest rates, including LIBOR and prime rates.

As of March 31, 2022, approximately 87% of the Company's debt securities portfolio were either floating rate with a spread to an interest rate index such as LIBOR or the prime rate. 76.6% of these floating rate loans contain LIBOR floors ranging between 0.50% and 2.00%.

In periods of rising or lowering interest rates, the cost of the portion of debt associated with the 4.875% Notes Due 2026 would remain the same, given that this debt is at a fixed rate, while the interest rate on borrowings under the Revolving Credit Facility would fluctuate with changes in interest rates.

Generally, an increase in the base rate index for floating rate investment assets would increase gross investment income and a decrease in the base rate index for such assets would decrease gross investment income (in either case, such increase/decrease may be limited by interest rate floors/minimums for certain investment assets).

Impact on net investment income from a change in interest rates at:

	(\$ in thousands)		
	1%	2%	3%
Increase in interest rate	\$ 1,523	\$ 3,167	\$ 4,814
Decrease in interest rate	\$ 746	\$ 746	\$ 746

Net investment income assuming a 1% increase in interest rates would increase by approximately \$1.5 million on an annualized basis. If the increase in rates was more significant, such as 2% or 3%, the net effect on net investment income would be an increase of approximately \$3.2 million and \$4.8 million, respectively.

On an annualized basis, a decrease in interest rates of 1%, 2% or 3% would result in an increase in net investment income of approximately \$746 thousand. The effect on net investment income from declines in interest rates is impacted by interest rate floors on certain of our floating rate investments, as there is no floor on our floating rate debt facility and the 2018-2 Secured Notes.
